PROFESSIONAL SUMMARY

Results-driven AI & Machine Learning Engineer with hands-on experience designing, fine-tuning, and deploying end-to-end ML pipelines, deep learning architectures, and NLP models. Highly proficient in PyTorch, TensorFlow, Scikit-learn, and Hugging Face transformers. Adept at translating complex data requirements into scalable AI solutions, optimizing model performance, and collaborating effectively within cross-functional Agile engineering teams.

TECHNICAL SKILLS

Core AI & ML:	Machine Learning Algorithms, Deep Learning, Natural Language Processing (NLP), Transformers, Feature Engineering, Model Optimization, Hyperparameter Tuning, Sentiment Analysis
Frameworks & Tools:	PyTorch, TensorFlow, Hugging Face, Scikit-learn, Pandas, NumPy, NLTK, OpenCV, Matplotlib, Seaborn
Languages & DB:	Python, SQL, MySQL, Data Wrangling, Query Optimization, ETL Basics
Platforms & DevOps:	GitHub, Git, Agile/Scrum, Model Documentation, System Testing

PROFESSIONAL EXPERIENCE

AI/ML Intern — **Technical One** April 2026 – June 2026 | Pune, India

- Completed weekly hands-on AI/ML deliverables assigned by technical leads with 100% on-time sprint completion.
- Engineered and benchmarked end-to-end Machine Learning pipelines and Deep Learning architectures for classification and predictive analytics tasks.
- Spearheaded the development of a high-accuracy Fake News Detection System utilizing Hugging Face transformer models (BERT), LSTM, and Scikit-learn classifiers.
- Demonstrated exceptional team coordination and active collaboration in daily Agile stand-ups, technical code reviews, and sprint backlog refinements.

KEY AI & ML PROJECTS

Fake News Detection System (Python, NLP, PyTorch, TensorFlow, Hugging Face, BERT) April 2026 – May 2026

- Built an end-to-end NLP deep learning pipeline to classify news articles as real or fake across a dataset of 45,000+ records.
- Fine-tuned BERT transformer models via Hugging Face and compared against LSTM and Random Forest benchmarks, achieving 94% accuracy and a 92% F1-score.
- Engineered a linguistic pattern analyzer to evaluate stylistic indicators, manipulative language, and bias signals in automated text.
- Packaged the solution into a modular, reusable inference pipeline for seamless deployment and cross-functional integration.

Customer Churn Predictive Model (Python, Scikit-learn, EDA, Feature Engineering) March 2025 – April 2025

- Performed exploratory data analysis and predictive modeling on 7,000+ customer records using Python and Scikit-learn.
- Engineered specialized tenure and contract features, boosting churn prediction accuracy and customer segmentation clarity by 28%.

EDUCATION

Master of Computer Science (Specialization: AI & Machine Learning) 2025 – 2027

Savitribai Phule Pune University, Pune, India

Bachelor of Computer Science 2023 – 2025

Savitribai Phule Pune University, Pune, India

CERTIFICATIONS

Data Analytics Job Simulation — **Deloitte Australia (via Forage)** May 2026 | Virtual Experience

- Performed data preparation and customer analytics using real-world business datasets.
- Conducted data analysis and experimentation to identify customer trends and insights.
- Applied commercial application and data-driven problem-solving techniques to support business decisions.
- Developed skills in data analysis, data interpretation, and communicating actionable insights.

Machine Learning & Advanced AI Techniques Certificate — [AI Academy of Technology](#)

2026

CORE STRENGTHS

- **Team Player & Collaboration:** Highly cooperative team member with strong interpersonal skills and proven cross-functional coordination.
- **Problem Solving:** Strong analytical mindset focused on modular code design, algorithm optimization, and solving real-world business challenges.
